

Chris Hoscheid Bio

Chris Hoscheid is the senior vice president of infrastructure for C Spire and is responsible for all critical facilities, systems, and network infrastructure. In addition, he manages all aspects of capacity, growth, and architecture, ensuring that C Spire continues to thrive in a rapidly evolving industry.

Hoscheid is a highly experienced and forward-thinking IT executive with a diverse background in technical sales, operations, consulting, and enterprise architecture. Before joining C Spire, Hoscheid was the vice president of managed and cloud services at TekLinks, where he led customer implementations and cloud architecture. His tenure at TekLinks spanned nearly two decades, during which he demonstrated a commitment to excellence and innovation.

Hoscheid has expertly managed multi-million-dollar budgets, led project and implementation teams, and developed key accounts, contributing to C Spire's increased growth and profitability.
